

PRB ACTI FLASH

FAST ACTION ALGAE AND MOULD TREATMENT

Benefit of the PRB ACTI FLASH +

- + Suitable for a wide range of substrates
- + Fast action (2 to 8 hrs) on contaminated substrates
- + Helps return materials to their initial appearance
- + A recommended application before painting

KEY PRODUCT INFORMATION

- 20 L Container.
- 0.48 t euro pallet, i.e. 24no 20 L containers.

STORAGE: 12 months.

CONSUMPTION: 0.2 L/m², i.e. 1 L per 5 m² subject to surface porosity.

**UK
CA**

USAGE GUIDE

WHERE TO USE?

A fast acting, ready to use exterior algae and mould decontaminating treatment. Once the surface has been cleaned and dry, you can use a surface water repellent such as **PRB HYDROFUGE** in order to maintain its appearance.

AREA OF USE

Facades:

- ✓ Renders, stone, marble, plastic coatings, paint, ceramic coatings, etc.

Roofing:

- ✓ Tiles, slates, etc.

Floors:

- ✓ Paving, concrete, etc.

Other substrates, contact us.

PRECAUTIONS FOR USE

- ✗ Not suitable for water treatment applications or fish ponds etc.
- ✗ Will damage plants if in direct contact. Immediately wash with water to dilute.

APPLICATION CONDITIONS

- Between 5°C and 30°C.

Should not be used:

- ✗ During frosty spells and at low temperatures.
- ✗ On frozen or thawing masonry.

Before applying cleaning products:

Carefully protect (polythene sheeting, tarpaulins etc) all adjacent structures from spray, especially: Joinery, rolling shutters, metalwork, aluminium rainwater goods, frames etc and surrounding vegetation, paving, etc.

A compatibility test on the surface to be treated is recommended.

TECHNICAL

COMPOSITION

- Sodium hypochlorite solution with a strong wetting agent.

PRODUCT CHARACTERISTICS

- Appearance: liquid
- Colour: pink
- Density: $1 \pm 0.05 \text{ t/m}^3$
- pH (alkaline): 12 ± 1

PREPARATION

APPLICATION

- Use the product undiluted.
- Mix the product before applying it in order to obtain a good consistency.
- Apply using a brush or long-haired wool roller or with a low pressure garden sprayer. **Be careful about runs onto and overspraying adjacent surfaces because the product has a bleaching agent** – Clean affected surfaces immediately with a wet cloth or dilute with water .

Once the application is complete, wait at least 4 hours, then rinse the substrate using a low pressure washer or hose and, depending on the degree of contamination, accompany cleaning with brushing in order to remove the dead organisms.

If there is some remaining contamination, we recommend waiting until the substrates are completely dry (1 to 2 days) before applying a new coating.

Advice:

In order to best protect the cleaned substrates from future attacks, apply:

- **PRB ACTIDÉMOUSSE HP** – apply with a sprayer without diluting.
- **PRB HYDROFUGE** – highly absorbant water repellent coating.
- **PRB HYDROFUGE WRS** – silicone free water repellent coating.

HEALTH & SAFETY

- May produce an allergic reaction. Harmful if inhaled, irritating to eyes and skin. Wear suitable protective clothing, gloves and eye/face protection.
- In case of contact with eyes, rinse immediately with plenty of water and seek medical help. After contact with skin, wash immediately with plenty of soap and water.
- Keep out of the reach of children.
- For further information, please read the Material Safety Data Sheet for this product.
